

**DBT - AIST International Laboratory
for Advanced Biomedicine**

DAILAB

Student Training for Advanced Research

STAR program

- Applications are invited from researchers (Students Ph.D. year 2 or 3 and Young PIs) to visit DAILAB and contribute to the ongoing research themes, on cell-imaging and drug screenings using novel assays for disease therapeutics, stress and metabolic regulations, for a period of three months to one year. This will provide training for research, living and working in Japan.
- The selected applicants will be supported for their travel, accommodation and living as per AIST rules.
- Interested students should send application including the following information in English to s-kaul@aist.go.jp or y-ohmiya@aist.go.jp
 1. Detailed photo CV
 2. Letter of recommendation from the mentor
 3. NOC (No Objection Certificate) from the head of their parent institute
 4. One page synopsis on points including (i) the reason for doing research (ii) main curiosity and the major question he/she wants to answer by research and (iii) level of satisfaction being a researcher as a career.
