Outline

- Motivation and Introduction
- The four defect in every human being
- The four defects in relation to medical and pharmaceutical world and research
- The four defects in relation to Covid-19
- Nobel Contribution of Novel Covid-19
- A humble request from research and media community
- The best safeguard
- Conclusion

Motivation and Introduction

- COVID-19 has destroyed the economy with many loosing job/business/life¹, **increased domestic violence as never before.**
- Many died on their way home, some committed suicide, some went into Depression.
- No reliable information from organisation like WHO who kept changing the statements on various aspects.
- SC : Covid-19 patients treated worse than animals^{2, 3}
- COVID-19 has made medical and pharmaceutical world a big circus and every individual a clown with gloves, mask, shield, and sanitizer in hand.
- COVID-19 is being used to propagate financial/political/research agenda.

¹1.89 crore salaried Indians lost jobs since April, around 50 lakh only in July, says CMIE

Common Man's Perspective of Research Ethics and COVID19

The Four Defect in Every Human

- OUR EYES ARE BLIND outside the range of 400 to 700 mill-micron
- OUR EARS ARE DEAF outside the range of 20 Hz to 20 kHz

The Four Defects in Every Human : Imperfect senses

- An uninformed Scientist may boast: We will use the instrument outside the range for perceiving things.”
- However, “even if we photograph stars eventually we have to take in by our senses what the photo shows. Furthermore, without our senses we cannot handle a camera. Even if amplified / refined by instruments, the knowledge is no more perfect than our imperfect senses.”

Imperfect Senses → Illusion → Mistake

Disease or Treatment Protocol

- Plague, the black death (1300 to 1800): Deaths of up to 75–200 million people in Eurasia and North Africa, upto 20 million in Europe alone.
- Cats were killed for 300 years, thinking them as children of Satan and cause of the Plague. One with cats were not affected. Hence concluded : rats are the cause. Recent research does not blame even the rats.

Cats and the Black Plague

Updated on February 4, 2010

Holle Abee [more](#)
Contact Author

Eventually, it was decided that the rats, not the cats, were responsible for spreading the black plague. Then, of course, everyone wanted to own a cat or two. And since cats are prolific breeders, it didn't take long for the demand to be satisfied. The laws which had been the cats' death sentence were repealed. In many regions, a new law took its place – one that protected felines instead of banning them and almost causing their extinction in Europe.

Maybe Rats Aren't to Blame for the Black Death

A provocative new study suggests that medieval plagues spread via fleas and lice on people.

3 MINUTE READ

BY [MICHAEL GRESHKO](#)

PUBLISHED JANUARY 15, 2018

Rats have long been blamed for spreading the parasites that transmitted plague throughout medieval Europe and Asia, killing millions of people. Now, a provocative new study has modeled these long-ago outbreaks and suggests that the maligned rodents may not be the culprits after all.

The study, published on Monday in the journal *PNAS*, instead points the finger at human parasites—such as fleas and body lice—for primarily spreading plague bacteria during the Second Pandemic, a series of devastating outbreaks that spanned from the 1300s to the early 1800s.

Disease or Treatment Protocol

- George Washington suffered sore throat and breathing problem after remaining wet for long in cold and chose the protocol of Bloodletting.

The mysterious death of George Washington

December 14, 2019 by NCC Staff

1.4k
Shares

1.1k

in

66

On December 14, 1799, George Washington died at his home **after a brief illness and after losing about 40 percent of his blood.** So what killed the 67-year-old former President?

Modern medical experts have narrowed it down to several likely reasons for why Washington fell ill and died in a 21-hour period. But the illness as diagnosed by his physicians isn't one of those likely causes of death. And it was this same group of physicians that let massive amounts of Washington's blood in an attempt to cure him

Two Contradictory Nature Publication

HIV Causes AIDS

W. BLATTNER, R. C. GALLO,
H. M. TEMIN

AIDS, a new disease, was first recognized in 1981, clustered in male homosexuals, intravenous drug abusers, and hemophiliacs in the United States and among sexually active heterosexuals in some countries of equatorial Africa. Human immunodeficiency virus (HIV) was first discovered in 1983 and was definitively linked in 1984 to AIDS patients and to groups whose members were at high risk for developing AIDS. The serological test for antibodies to HIV

HIV Is Not the Cause of AIDS

PETER DUESBERG

Human immunodeficiency virus (HIV) is not the cause of AIDS because it fails to meet the postulates of Koch and Henle, as well as six cardinal rules of virology.

1) HIV is in violation of Koch's first postulate because it is not possible to detect free virus (1, 2), provirus (3-5), or viral RNA (4, 6, 7) in all cases of AIDS. Indeed, the Centers for Disease Control (CDC) has established guidelines to diagnose AIDS when all laboratory evidence for HIV is negative (8).

Mad Cow Disease

- Name by scientific community suggests cow has gone mad. Cows get it when fed dried and powdered beef as a supplement.
- Well known that cow is herbivorous, who has gone mad, cow or we?

All About BSE (Mad Cow Disease)

Español

The word BSE is short but it stands for a disease with a long name, bovine spongiform encephalopathy. "Bovine" means that the disease affects cows, "spongiform" refers to the way the brain from a sick cow looks spongy under a microscope, and "encephalopathy" indicates that it is a disease of the brain. BSE is commonly called "mad cow disease."

Genetically Modified (GM) Food

- GM organism (GMO) has its DNA altered with DNA from another organism (bacterium, plant, virus or animal).
- Done to create consistent higher yield crops, and resist pest.
- A rat gene can be put into lettuce to make a plant that produces vitamin C or splice genes from the cecropia moth into apple plants, offering protection from fire blight, a bacterial disease that damages apples.
- Have GM apple, can still be called vegetarian?

AUGUST 11, 2015

Amid debate over labeling GM foods, most Americans believe they're unsafe

BY MONICA ANDERSON

The debate over the safety of genetically modified foods has put state lawmakers who favor requiring labeling of these products at odds with counterparts in Congress who oppose it. Americans' concerns about GM foods are providing the backdrop: A majority of them believe such foods are generally unsafe to eat.

Views on Safety of Genetically Modified Foods, by Key Demographics

Smoking and COVID-19

- Is it about the research or who sets the objective of the research?

Smokers Hospitalized Less Often for COVID-19

By Carolyn Crist

April 29, 2020 - Today in the world of coronavirus news:

Few of those hospitalized with the coronavirus are smokers, and researchers are trying to understand why, according to VICE.

One hypothesis is that nicotine, which has anti-inflammatory properties, may interfere with the way that COVID-19 causes an overreaction of the immune system.

The hypothesis comes from Konstantinos Farsalinos, a cardiologist in Greece who focuses on tobacco-use reduction. Farsalinos noticed that few COVID-19 patients who were hospitalized in China were smokers, though about half of men in the country smoke.

Quitting smoking might reduce severe coronavirus infection risk: Study

The findings, published in the journal [Developmental Cell](#), may explain why smokers appear to be particularly vulnerable to severe COVID-19 disease.

PTI • May 19, 2020, 15:39 IST

New York: Cigarette smoke spurs the lungs to make more of the receptor protein which the novel coronavirus uses to enter human cells, according to a study which suggests that quitting smoking might reduce the risk of a severe coronavirus infection. The findings, published in the journal [Developmental Cell](#), may explain why smokers appear to be particularly vulnerable to severe COVID-19

disease.

"Our results provide a clue as to why smokers who develop COVID-19 tend to have poor clinical outcomes," said study senior author Jason Sheltzer, a cancer geneticist at Cold Spring Harbor Laboratory in the US.

Mathematical Models Failed in India : ICMR

Mathematical models on severity of Covid-19 in India carried strong bias, failed: IJMR editorial

PTI | Updated: Jun 18, 2020, 19:38 IST

NEW DELHI: Various mathematical models on the severity of the [Covid-19](#) pandemic in India carried a "strong element of bias and used assumptions" to predict cases and deaths, an editorial published in [ICMR's](#) Indian Journal of Medical Research has said.

It said it "is a huge risk" to solely rely on these models for policy decisions on advance planning since predicting infectious diseases for a new pathogen is an "extremely perilous proposition" and hence it should be avoided.

Imperfect Senses → Illusion → Mistake → Cheating

Treatment protocol : Mask

- Science Times⁵ : " ..virus would further concentrate and circulate within the nasal passages and could eventually travel into the brain"
- Danger : increased airway resistance, accumulation of carbon dioxide, hypoxia or inadequate oxygen supply, headaches...
- ASA : it is wrong for any advertiser to claim that surgical masks can protect against coronavirus. Public Health England (PHE) worry that they (mask) could encourage the spread of the virus⁶.

Treatment protocol : Sanitiser

- The alcohol content in sanitiser gets absorbed by skin, mixes with blood and is detectable in breath⁷.
- Dendritic cells below the skin and responsible for immunity, are killed.
- Sanitizer kills even good bacteria on skin, wreaking havoc in our healthy bacterial community.⁸
- FDA: sanitizer with methanol leads to blindness, hospitalizations and death.

सेनेटाइजर खतरनाक, साबुन का करें उपयोग शोध में खुलासा:- सेनेटाइजर के 50 से 60 दिन लगातार उपयोग से कई तरह का खतरा

सुधा गौरव (संवाददाता)
कानपुर देहात— कोरोना वायरस के कारण सेनेटाइजर की खपत अचानक बढ़ गई है। अस्पताल से लेकर घर पर सेनेटाइजर का उपयोग हो रहा है लेकिन आपको यह जानकर हैरत होगी कि सेनेटाइजर का 50 से 60 दिन तक लगातार उपयोग कैंसर, लिवर, किडनी, फेफड़े सहित विभिन्न रोगों की वजह बन सकता है। खासकर खुशाम्बू, चाले सेनेटाइजर को मार-मार सूंघने से 2 से 10 साल तक की उम्र के बच्चों व गर्भवती महिलाओं की इन्फ्यूनिटी घट सकती है। हाल ही में किये गये शोध में यह खुलासा हुआ है। सेनेटाइजर में ट्राइकोसॉल, बेन्जाल कोनिजियम जलोराइड, फॉर्मलेट्स जैसे खतरनाक पदार्थ जाले जाते हैं जो हमारे शरीर को कुछ इस प्रकार प्रभावित करते हैं— ट्राइकोसॉल आसानी से त्वचा अवशोषित कर लेती है। यह कोमिकल शरीर को अंदर जाकर मांसपेशियों में ऐंठन—अकड़न की समस्या पैदा करता है। बेन्जाल कोनिजियम क्लोराइड सेनेटाइजर में उपयोग होने वाला यह कोमिकल हानिकारक कीटाणुनाशक

इससे त्वचा में जलन, खुजली, चकते पड़ने की समस्या पैदा हो सकती है। फॉर्मलेट्स यह कोमिकल सेनेटाइजर में खुशाम्बू पैदा करता है। अक्सर खुशाम्बू, युक्त सेनेटाइजर लगाने के बाद बच्चे उल्टे बुंधते हैं। लगातार सेनेटाइजर बुंधने की आदत से शरीर के लीवर, किडनी, फेफड़े व प्रजावन रॉत्र पर असर होता है। साथ ही गर्भवती महिलाओं व बच्चों की इन्फ्यूनिटी कम हो सकती है। उपयोग करते-करते ही मीम के साथ उबले

Treatment protocol : Social Distancing

- WHO confused? On 8th June with all preparation for media briefing:” ..rare that an asymptomatic person actually transmits”,
- On 9th after uproar (pressure?):” ..not show symptoms, many of them may transmit the disease. ..modelling studies(no real study) have put the extent of asymptomatic transmission to about 40%”
- No lockdown in Taiwan/Japan..⁹, still least number of cases/death, why?

HEALTH AND SCIENCE

WHO walks back comments on asymptomatic coronavirus spread, says much is still unknown

PUBLISHED TUE, JUN 9 2020-10:07 AM EDT | UPDATED TUE, JUN 9 2020-12:45 PM EDT

Healthcare Writer: [Jasinder Kaur](#) | [WILL FEAR](#)
PHOTOGRAPHER: [JASINDER KAUR](#) | [EWALD TOA](#)

SHARE [f](#) [t](#) [in](#) [e](#)

KEY POINTS

- The WHO scrambled to clarify its comments that transmission of the coronavirus by people who never developed symptoms is “very rare.”
- The remarks drew skepticism from physicians and others across social media.
- Dr. Maria Van Kerkhove, head of the WHO’s emerging diseases and zoonosis unit, said it’s a “really complex question” and much is still unknown.

Ashish K. Jha
@ashishkgha

This from @WHO is getting a lot of attention and creating confusion.

I want to quickly share what I understand about this.

Bottom line question:

Are infected people without symptoms an important cause of spread?

My best guess: yes.

A thread

Coronavirus patients without symptoms aren't driving the spread of the virus, the WHO says. [cnbc.com/2020/06/09/coronavirus-who-says.html](https://www.cnbc.com/2020/06/09/coronavirus-who-says.html)

Treatment protocol : Plasma Therapy

- Antibody from Corona recovered patient's blood, put it in one with Corona
- Any research evidence? Only one from China, **on 5 patients only**.
- Plasma therapy causes : **Transfusion-related acute lung injury (TRALI)**, can cause death¹²
- FDA : Plasma Therapy has not yet been shown to be effective in COVID-19, AIIMS on Aug 6, 2020, ICMR on Sep 9.

COVID-19: No benefit of plasma therapy in reducing mortality risk, says AIIMS Director Dr Randeep Guleria

The therapy involves taking antibodies from the blood of a person who has recovered from COVID-19 and transfusing those into an active coronavirus infected patient to help kickstart the immune system to fight back the infection.

India's largest trial covered 39 hospitals, over 400 patients

Coronavirus plasma (CT) therapy failed to benefit coronavirus (COVID-19) patients, the largest trial conducted across 39 hospitals in India and spearheaded by the Indian Council of Medical Research (ICMR) found.

The trial spanning April-July enrolled 464 hospitalized patients with "moderate" COVID-19 and administered coronavirus plasma – antibodies derived from plasma filtered from the blood of those who have recovered from COVID-19 – on some of them.

The DCGI has granted approval for use of the drug to treat mild COVID-19 patients, but on what basis? **17**

Favipiravir: Studies Involving Animal Models Shows Favipiravir Has Very Weak Effect On SARS-CoV-2 And Not Viable As An Effective Therapeutic

Source: Favipiravir And COVID-19 Jun 23, 2020 2 months ago

Favipiravir: The COVID-19 pandemic has made the medical and pharmaceutical world one big circus with many charlatans including Government authorities for the sake of greed, power or ego endorsing drugs that do not have any proven efficacy to treat the COVID-19 disease let alone safety studies done on their usage. One example is hydroxychloroquine and we are not going to elaborate on it here as everybody by now knows the saga. Unfortunately the losers at end of this whole debacle are the general public who are sometimes administered with ineffective or worse lethal drug when they are infected with the COVID-19 disease and the doctors who have to listen to corrupted or incompetent health and government officials dictating the drugs to use. **18**

Quiz Time!

- For how many days were the schools shut in Japan/Vietnam?
- Can you name the countries that never went on lockdown and still managed the Covid-19?
- Which leader pushed his country-made tonic (Ayurvedic medicine) as Covid organics despite of WHO warning?

Nobel Contribution of Novel Covid-19

- Low death rate post covid, CEO, Anthyesti Funeral Services, declared employee pay cuts ²⁷
- Air and water pollution level Decrease : What crores of rupees could not do, one month of lockdown did, ²⁸
- Simple living high thinking : reducing dependence on outside eating,.. adopting namaste..
- One side we pollute the air, water, other side, spend crores for researching to clean. Each year lockdown for short period is good alternative.

A humble request from research and media community

Media

- Just don't report the number of cases (false positive/negative) and scare the common people, put some disclaimer as FDA/testing equipment

Research Community

- Just don't rely on simulation results. Follow up on the positive cases and see if there is further onwards transmission/symptom development and come to conclusion after real studies in Indian scenarios.

The Best Safeguard : our old tradition

Not tested on animal, not published, not having side effect, probably no flue

- Drinking warm water only, Steam Inhalation
- Putting two drops of A2 cow ghee before sleeping
- Having warm water mixed with lemon and honey in empty stomach.
- Have these displayed all around in addition to

Conclusion

- We have to pay for our fiddling with mother nature.
- Science and scientists are worshipped as God, but lying, cheating and saying sorry are quite frequently seen in research because of the four defect.
- People are dying because COVID-19 disease or treatment protocol, we are free to decide.
- Our research ethics need serious revisit.
- AYUSH system of medicine has been in practice in India when rest of the world was considering cat to be children of satan.
- If any one received experimental drugs, mechanical ventilator and then plasma therapy, what is the probability that he will be alive??
- Better these treatment protocols and surveys do not reach our innocent villages.
- Thanks to Indian Government for giving AYUSH.

Thank You!
