Subject: Implementation of Undergraduate curriculum

The Faculty Board of Centre for Energy Studies discussed the matters for discussion listed in the note No. IITD/ADAC-97 dated 08/02/2013 received from the Office of Dean Academics. The following was recommended in this regard.

1. Practical efficacy and desirability of entrusting the tutorials (of 3-1-0 course) to Teaching Assistants to hold the same in parallel sessions may be carefully assessed as the Teaching Assistants may not always be able to do justice with the assignment.
2. Center for Energy Studies intends to offer Interdisciplinary Areas of Specialization in (a) Renewable Energy Technologies and (b) Energy Conservation and Management to B.Tech students of the Institute.
3. Centre for Energy Studies would also like <sup>to</sup> explore the possibility of associating with Departments of Mechanical, Electrical and Chemical Engineering in offering M.Tech component of a Dual Degree Program with B.Tech in the core engineering discipline of the department and M.Tech in Renewable Energy
