

OFFICE OF THE DEAN, ACADEMICS

NO. IITD/ ADAC _____
DATE: 4th June, 2013

The Department of Mechanical Engineering was requested to design the following two courses:

1. Engineering Drawing/ Engineering Communication
2. Product Realization/ Manufacturing

The credits allotted to these courses, as per the Senate approved Concept Paper, are 2 credits each. The Department did not agree to frame these courses within the prescribed credits limits. The UCIC discussed this matter and decided to seek the guidance from the Senate. The Senate in its meeting on 20th May, 2013 decided that the courses must be as per the prescribed credits limits. The ME Department be requested to again to design the courses within the prescribed credits. In case the ME Department is not in a position to do the same, the Senate Chairman was authorized to take appropriate action to get these courses designed so as to run from the next semester. The HoD has now informed (e-mail attached) that the ME Department is not in a position to meet the requirement of the credits. However, some faculty members in their individual capacity have generated a course template each for the two courses.

In the above situation, the following course of action is suggested:

1. The Chairman, Senate forms a Committee for each of the courses to design a course template for each of these courses. The template will be signed by the Dean, Academics.
2. This course will run under the supervision of the First Year Teaching Council including assigning course coordinators/teachers and finalization grades.

The Director may kindly consider the above and approve as appropriate.
